

KPH | KOANUI POLLED HEREFORDS

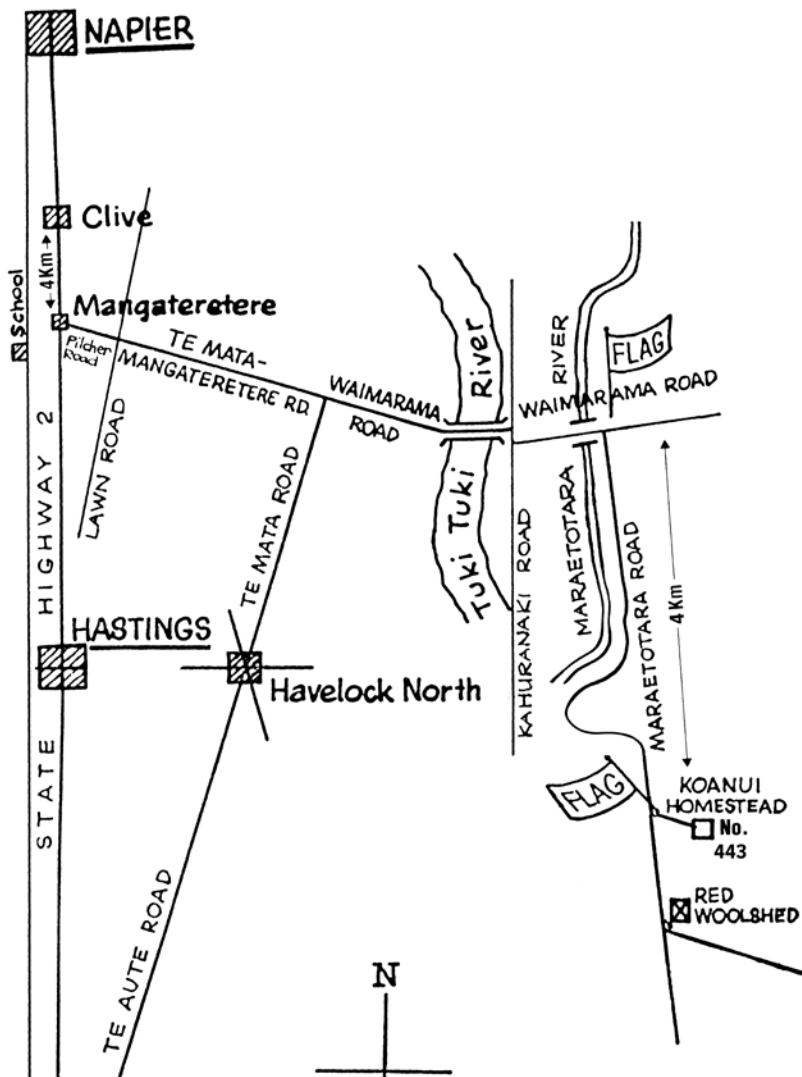

2020 Sale Catalogue

60 Rising Two Year Old Bulls

ONLINE BIDR[®] AUCTION
1 pm Thursday 11 June

www.koanuiherefords.co.nz

OPEN DAYS

Pre-sale bull tours every Wednesday with additional private viewings also available.

Tours meet at the truck turning circle near the cattle yards at 443 Maraetotara Road, Havelock North.

Bookings essential via (06) 874 7844 or

www.koanuiherfords.co.nz

KPH | KOANUI POLLED HEREFORDS

60 Rising Two Year Old Polled Hereford Bulls

ONLINE BIDR[®] AUCTION

1 pm Thursday 11 June

This year's selection of bulls are being sold on bidr[®] by online auction. Photos and videos of all bulls available on bidr[®], our website, and Facebook. Contact us or your agent for buying advice.

- 800 registered cows
- Good value, top genetics
- All performance recorded
- Bulls semen & service tested
- Performance & BVD tested
- Rigorous selection
- TB status C10
- *Satisfaction guaranteed!*

OPEN DAYS

Pre-sale bull tours every
Wednesday by appointment.

BYO 4x4, only one bubble per vehicle.

Bookings essential via phone or

www.koanuiherefords.co.nz

Conditions of Sale

1. CONDITIONS FOR BULL AUCTIONS CONDUCTED ON bidr®

All intending purchasers must register online at www.bidr.co.nz prior to the sale.

bidr®'s Conditions of Sale and Terms of Use apply. These terms can be inspected at <https://bidr.co.nz/content/user-terms-conditions>

PGG Wrightson (PGW)'s Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW. The current versions of PGW's Monthly Account Terms of Trade are also available online at:

<https://www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions> or in hardcopy on request.

On behalf of the vendor, PGW will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock agents with a PGW Monthly Account that are also Accredited Agencies on bidr® where the buyer has registered on bidr® under that Accredited Agency.

2. Transfers will be available on Stud Bulls. Please provide Transfer Herd Number(s) on Purchaser's Slip if a transfer is required.
3. PAYMENT: Fourteen days after the sale.
4. T.B. STATUS C10.
5. No warranty will be given with any Lot, and as all Lots are open for inspection prior to the sale, the same are sold with all faults, if any. No compensation shall be made in respect of any fault or error of description of any Lots; however, the vendor reserves the right to make compensation to a buyer if it is the vendor's wish. It is recommended to inspect bulls before the sale where possible.
6. Although all care has been taken in compiling this Catalogue, no responsibility will be taken for any errors or omissions thereof.
7. Every Lot will be at the risk of the purchaser as from the fall of the hammer.
8. Buyers are advised to insure Bulls. All Bulls remaining on the property pending delivery should be insured by the Purchaser as no responsibility shall be taken by the Vendor. All Bulls are to be uplifted by 1 July, 2020 unless arrangements prior to the sale have been made.
9. All Lots sold exclusive of G.S.T.
10. ALL STUD BULLS purchased must be uplifted as soon as transport is available.
11. All Bulls have been Service and Semen tested. All bulls are BVD Tested Negative and vaccinated for BVD with Hiprabovis prior to sale.

The Koanui Sale 2020

Dear Fellow Beef Breeders,

The Koanui 2020 Sale will be like no other. Due to the uncertainty of COVID 19 restrictions, we have decided to run our bull sale online using the bidr® online livestock auction system. We feel the bidr® system will give you the best opportunity to purchase the pick of our rising two year old bulls in a safe and fair auction.

Our 2020 sale offering presents several new and exciting sires that are breeding very well. We welcome and encourage you to book in with us to view the bulls before sale day. Every Wednesday until sale day will be an Open Day. Private Bull Viewing Tours will be run in accordance with the protocols of the current COVID-19 restrictions. Please see inside front cover for details.

We will have current photos and videos of each bull available. Videos of each bull will be able to be viewed on bidr®, our website and on Facebook. We are happy to discuss the animals with you directly over the phone or through an agent. We aim to enable you to access the very best possible advice to assist you with your selections.

We recommend you log in to bidr® and test your connections before sale day. Please contact us or ask your local livestock agent for assistance if necessary, and schedule to be online from 1:00pm to 3:00pm on Thursday 11 June for the auction.

Although the online sale platform is new to many of us, we are excited to see what it can offer. We encourage you to get comfortable in front of a computer and enjoy the opportunity to purchase good value top Hereford genetics without having to travel.

It is a tough year with the nationwide drought, a global pandemic and recession. We are fortunate to be operating essential businesses in primary industries, and it is good to see the tide turning on the environment and the urban perception of farmers. Meanwhile, it still isn't easy for us farmers. 2020 is a year we must get through together. We will miss providing hospitality and steak sandwiches on sale day however we feel that our decision to go online will enable everyone to stay safe, remain healthy and will help the bulls to get out there and do their job.

We just want our bulls out there doing their jobs. As always, we stand behind our product. We guarantee our bulls so you can purchase with confidence at Koanui where satisfaction is guaranteed.

We hope to see you at a social distance over the coming weeks.

Kindest regards

Chris and Jennifer Chesterman

Gallant was purchased in 2017 at the National Beef Expo sale for \$40,000 from Grassmere Polled Herefords. He is doing a superb job with both sons and daughters looking the part. The phenotype, soundness, and docility are looking exceptional. The consistency and quality of his offspring are very pleasing and with a quarter of the offering in this sale by him that is the proof! They are good functional cattle that will last.

5024 has the cosmetic appeal and impeccable feet that make up an important part of our programme. He will be a maternal powerhouse with plenty of milk and a dam that has the best udder at Koanui. There are some significant Benchmark animals in 5024's pedigree including Platinum Benchmark Koanui Dainty 2453. We have used four sons from 5024's dam, Koanui Minerva 9079.

5088 is an important corner stone sire within our programme at Koanui. He has impeccable feet and legs, temperament, is well bodied and very correct. His sire was introduced as a new bloodline and his dam, a Spectre female, is from one of our best cow families. Xcelorator is certainly breeding top offspring. He is in the very top of the breed for every \$ Index. In 2019 a half share in Koanui Xcelorator 5088 was sold to Kokonga Herefords. We have retained a 5088 son as a herd sire at Koanui with lovely calves now on the ground.

Doubtless is working very well especially in the heifer programme with being in the top of the breed for calving ease and gestation length. He is a bull with exceptional length, cosmetics and excellent ratio of birth to growth and carcass weight. Doubtless is very high in every \$ index. He is a sire trait leader for Short Gestation Length and 400 day-weight EBVs.

King was purchased from the Earnscleugh sale at Alexandra in 2017. This bull has done a top job as he was purchased as an outcross with constitution and performance. He has excelled in these traits and more with impeccable feet and docility. We have retained a very exciting son in P438 and will use Lot 9, P607 as well.

A bull imported from the Yavenvale herd in Australia for his high IMF% and outcross breeding. Kahuna is a sire trait leader for High IMF% and short gestation length EBVs. He also has high fats and very good Milk EBV. We have used a very good son, Koanui Kahuna 7299 and look forward to his daughters in the herd. Lot 25, P226 is a standout son.

EBVs Explained

Estimated Breeding Values (EBVs) are estimates of the animal's genetic merit, half of which will be passed onto its progeny. They are expressed in units of measurement for each trait. For more information and EBV Tip sheets refer to <http://breedplan.une.edu.au>

Calving Ease EBVs

CE DIR – Calving Ease Direct % indicates how easily this bull's progeny are likely to be born. A higher figure means a higher likelihood of easy calving.

CE DTRS – % indicates how easily this bull's daughters are likely to calve. A higher figure means a higher likelihood of easy calving in the daughters.

GEST – Gestation Length in days indicates the predicted gestation length relative to average, the lower the value the shorter gestation length of the bull's calves.

BWT – Birth Weight (kg) predicted from analysis of actual birth weight data, the lower the value the smaller the sire's contribution to the weight of the calf at birth.

Growth and Milk EBVs

200 – 200 Day growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400 – Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600 – 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MAT – Maternal Value EBV is an index of the EBVs for the 200-Day Growth and 200-Day Milk, and is calculated by the following formulae: For sires: $MV = 1/2 \text{ Milk EBV} + 1/4 \text{ 200-Day Growth EBV}$. For dams: $MV = \text{Milk EBV} + 1/2 \text{ 200-Day Growth EBV}$.

MILK – 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 day weight of their calves.

Fertility EBVs

SS - Scrotal Size (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

DTC – Days to Calving (days) is an indicator of female fertility. Lower, or more negative, Days to Calving EBVs are generally more favourable reflecting females that get in calf quicker after mating, have early puberty and early return to oestrous after calving.

NZ HEREFORD Breed Average EBVs for 2018 Born Calves

CALVING EASE EBVs				GROWTH & MILK EBVs					FERTILITY	
CE DIR	CE DTRS	GEST	BWT	200	400	600	MAT	MILK	SS	DTC
+1.6	+1.6	-0.5	+4.3	+33	+55	+78	+68	+16	+2.0	-2.8

Carcase EBVs

CW - Carcass Weight EBV (kg) estimates the genetic difference in carcass weight at a standard age of 650 days. More positive EBVs indicate heavier carcasses at 650 days of age.

EMA - Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

RIB - Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

RUMP - Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site on a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity. Two fat EBVs are listed as there is variation between animals regarding fat depth at the two sites.

RBV – Retail Beef Yield % EBVs are estimates of genetic differences between animals in boned out retail beef yield in a standard weight steer carcass. RBV EBVs are reported as differences in percentage (%) yield. Larger, more positive, RBV EBVs are generally more favourable.

IMF - Intramuscular Fat % EBVs are estimates of generic difference between animals in intramuscular fat (marbling) at the 12/13 rib site in a 300kg carcass. Larger, more positive, IMF EBVs are generally more favourable.

\$ Index Values

The Indexes are derived by acknowledging the relative importance (weightings) of EBV's across the 16 EBV's produced by BREEDPLAN. The Indexes are derived from calculations of weightings assigned to the EBVs which relate to New Zealand specific market returns, less the cost of production, with all indexes expressed in dollar terms. There are four breed-specific market Indexes for New Zealand Hereford cattle:

HPrime – Hereford Prime/Maternal \$ Index - Focuses on producing a 275kg carcass weight steer off grass by 18 months of age, suitable for local trade, from a self-replacing cow herd.

Export – Export/Maternal \$ Index -Focuses on the production of a 300kg carcass weight steer off grass, by 20 months of age, from a self-replacing cow herd (a herd producing females over a 5 year period to continue the breeding programme).

Dairy Maternal Index – Aims to produce readily marketable crossbred steers at 475kg live weight by 16 months of age and also dairy cross heifers for use as dams in beef-breeding cow herds.

Dairy Terminal Index – Estimates the genetic differences between animals in net profitability per cow joined for an example commercial dairy herd targeting the production of dairy beef progeny where all progeny are slaughtered. Steers are assumed marketed at 500 kg live weight (260 kg carcass weight and 6 mm fat depth) at 18 months of age.

One of the feature bulls for the 2020 Sale. P581 is a bull with outstanding balance of length, great scrotal and a real sires' presence. His sire, Koanui Xcelerator 5088 (sold half shares to Kokonga for \$30,000) is an exceptional breeding bull with great balance of figures and also very sound. P581 combines high Calving Ease, moderate birth weight and good performance with outstanding \$ Indexes. He ranks in the top 5% of the breed for every \$ Index.
