2023

### **ON FARM AUCTION:** 1pm, Thursday 15 June

At 'The Sale Shed' Past 811 Maraetotara Rd Havelock North

www.koanuiherefords.co.nz

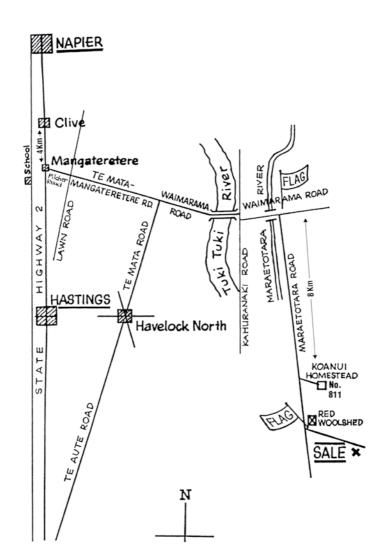

## KPH KOANUI Polled Herefords

#### Building on 50 years!

# ON FARM AUCTION with bidr® 1 pm Thursday 15 June

The 2023 Sale is being held on-farm and online by bidr hybrid auction. If possible, we encourage you to view the animals prior to sale. Spark reception and internet will be available on sale day. Contact Koanui or your livestock agent for further information.

- More than 800 stud cows
- Rigorous selection
- Performance recorded
- Bulls semen & service tested
- BVD vaccinated
- TB status C10
- Satisfaction guaranteed!

#### The Koanui Sale 2023

#### Dear friends and fellow cattle breeders,

There is no better metaphor for the last year than the quality of Feijoas on our garden trees. "Below average" if you ask Allie Chesterman. A mild winter last year has seemingly carried on through to mid-March this year! That said, the rainfall we have experienced has been unprecedented. This, combined with a general lack of sunshine and the devastating effects of Cyclone Gabrielle, has been very challenging for the community.

To those who have been struggling, we are here to support you in any way we can. While we hope you can all can come and enjoy our hospitality, we understand this might not be possible. If you are unable to attend the sale in person, we will guarantee your selection with a replacement if your bull doesn't suit your requirements when he arrives. We want to see our clients' programmes succeed, so we will be here to work together to make that happen.

While Koanui itself was relatively unscathed in the Cyclone, our other blocks along the Maraetotara were more severely affected. Not one day during March was spent doing our usual work as we got the farm stockproofed once again. We consider ourselves fortunate, as other than tracks our primary infrastructure was largely unaffected. The cattle have recovered well and have been enjoying the more settled weather over the last month.

Although most of farm was all right after Cyclone Gabrielle, the hills show the damage.

You may have also heard about 'Bay Bulls', our combined sale collaboration with Hallmark Angus. The idea of working with Hallmark Angus is to provide cattle breeders with an excellent opportunity to purchase top genetics from either breed over two days of sales. We hope it will also bring some muchneeded tourism back to the Bay as we encourage out of town guests to make the most of Hawkes Bay on their business trip.

Over the last two years we have undergone extensive investment into our breeding herd, and we are seeing exciting results. This investment includes six new New Zealand sires, two new imported sires, and a large increase in our embryo transfer programme. The combination of new genetics and our continued investment in geonomics is putting our herd sires at the forefront of the breed. We have continued to cull extensively to prioritise phenotype, soundness, structure, and temperament to produce cattle with longevity that will thrive across diverse environments and breeding programmes.

We would love you to join us on sale day. It's been a tricky season for all, so we hope you can come and enjoy some fine Hawkes Bay hospitality. We look forward to the opportunity to hosting you and enabling all our farming clients and friends to have a catch up together on sale day.

#### **Kind regards**

#### Chris, Jen, and the Chesterman family

Chris and the bulls have been busy getting ready for the sale.

#### **EBVs Explained**

Estimated Breeding Values (EBVs) are estimates of the animal's genetic merit, half of which will be passed onto its progeny. They are expressed in units of measurement for each trait. For more information and EBV Tip sheets refer to <u>http://breedplan.une.edu.au</u>

#### **Calving Ease EBVs**

**CE DIR** – Calving Ease Direct % indicates how easily this bull's progeny are likely to be born. A higher figure means a higher likelihood of easy calving.

CE DTRS – % indicates how easily this bull's daughters are likely to calve. A higher figure means a higher likelihood of easy calving in the daughters.

**GEST** – Gestation Length in days indicates the predicted gestation length relative to average, the lower the value the shorter gestation length of the bull's calves.

**BWT** – Birth Weight (kg) predicted from analysis of actual birth weight data, the lower the value the smaller the sire's contribution to the weight of the calf at birth.

#### Growth and Milk EBVs

**200** – 200 Day growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

**400** – Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

**600** – 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

**MAT** – Mature Cow Weight EBV (kg) is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd.

MILK - 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200 day weight of their calves.

#### Fertility EBVs

**SS** - Scrotal Size (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

**DTC** – Days to Calving (days) is an indicator of female fertility. Lower, or more negative, Days to Calving EBVs are generally more favourable reflecting females that get in calf quicker after mating, have early puberty and early return to oestrous after calving.

NZ HEREFORDS Breed Average for 2021 Born Calves

#### **Carcase EBVs**

**CW** - Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days. More positive EBVs indicate heavier carcases at 650 days of age.

**EMA** - Eye Muscle Area EBV (cm2) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. More positive EBVs indicate better muscling on animals.

**RIB** - Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity.

**RUMP** - Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site on a 300kg dressed carcase. More positive EBVs indicate more subcutaneous fat and earlier maturity. Two fat EBVs are listed as there is variation between animals regarding fat depth at the two sites.

**RBY** – Retail Beef Yield % EBVs are estimates of genetic differences between animals in boned out retail beef yield in a standard weight steer carcase. RBY EBVs are reported as differences in percentage (%) yield. Larger, more positive, RBY EBVs are generally more favourable.

**IMF** - Intramuscular Fat % EBVs are estimates of generic difference between animals in intramuscular fat (marbling) at the 12/13 rib site in a 300kg carcase. Larger, more positive, IMF EBVs are generally more favourable.

#### \$ Index Values

A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values.

**Hereford Prime Index** - Estimates the genetic differences between animals in net profitability per mixed age cow joined for a typical self-replacing commercial herd. Heifers are retained for breeding and so maternal traits are of importance. Steers target 550 kg live weight (300 kg carcase weight & 7 mm P8 fat) at 20 months of age, and heifers 475 kg (260 kg carcase weight & 8 mm fat depth), at 22 months of age.

**Beef Heifer Index** - Estimates the genetic differences between animals in net profitability per yearling heifer joined for a typical self-replacing commercial herd. Steers target 510 kg live weight (280 kg HSCW and 7 mm P8 fat depth) and heifers 450 kg (250 kg HSCW and 8 mm P8 fat depth) at 20 months of age.

**Dairy Beef Index** - Estimates the genetic differences between animals in net profitability per mixed age dairy cow joined with all progeny destined for slaughter. Steers and heifer progeny target 550 kg live weight (300 kg carcase weight and 6 mm fat depth) at 24 months of age and at 475 kg live weight (260 kg carcase weight and 7 mm fat depth) at 22 months, respectively.

The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither NZ Herefords nor ABRI oversee or audit the collection of this data.

Milton ticks so many boxes. Combine a superb nature , softness, great skin and ideal cosmetics of a dark, rich red colour what more could you ask for? Milton is a high growth bull with moderate birth and high calving ease. He is in the top 5% of the breed for every \$ Index and top 1% for Hereford Prime. He was used as a yearling and we have retained semen for within herd use. He has also been collected for a limited release of semen to a commercial dairy client.

Used as a yearling over heifers, Magic S173 is the ideal bull for that job with very high calving ease and a pedigree that is as safe as houses. You would struggle to get such great EBV's in a bull with such length and a good back-end. His dam has another ripper of a calf this year too. He is a Boehringer Ingelheim Dairy Sire with top \$ Indexes.

A sale feature, some bulls have stand-out presence and style and just seem to know that they are good! Oropi S386 is one of those special bulls. He has wonderful balance, depth, and cosmetic appeal. He is quiet but still stands with that great outlook. This is a top notch pedigree with the maternal grand-dam, Koanui Cynthia 1112, a donor cow and one of the best at Koanui. His sire has excelled in his contribution here. We have retained another Oropi son, Koanui Transformer S560, who is another knock-out! Semen to be retained for within-herd use.

A real eye catcher in the paddock with a smooth dark coat, strong pigment and length of body. There are some top quality females in the back of this pedigree and plenty of fertility in the breeding as seen in the very high scrotal size and short days to calving EBVs, both in the top 10% of the breed. This bull has a nice balance of figures and more growth than indicated.

### BBSE - Bull Breeding Soundness Evaluation March 2023

The Gold standard for this test is to collect the bull by an Artificial Vagina and have the semen assessed by a registered morphologist. All bulls that are tested by Tararua Breeding Centre are tested using this Gold Standard.

| LIBIDO           | Bulls must demonstrate the ability to mount an "in season" heifer or cow.  |
|------------------|--|
| PENILE SOUNDNESS | Each bull's extended penis is examined during mounting for structural soundness, injuries and abnormalities, including deviations, persistent frenulum's, adhesions, genital warts and injuries that may have occurred while out mating.         |
| SEMEN EVALUATION | Each bull's ejaculate, which is collected in an artificial vagina, is<br>examined microscopically by a registered Morphologist for Density,<br>Motility, Morphology and must pass the minimum standards of 70%<br>normal at the time of testing. |

# **Conditions of Sale**

 This sale is a "Hybrid online and on farm auction sale." In addition to the normal on-farm auction format the sale will be hosted by bidr<sup>®</sup> (www.bidr.co.nz) as a HYBRID auction, with online bidding and a live-stream available on sale day. Note the on-farm auctioneer remains in control of the sale and the fall of the hammer.

All intending ONLINE purchasers must register on bidr<sup>®</sup> in advance of the sale date, by visiting the website and using the "sign up" button, adding their contact information and nominating the agency they would like to purchase through and account held with that agency. Alternatively, purchasers can organise an agent from one of the agencies listed on bidr<sup>®</sup> to buy on their behalf.

All intending ON-FARM purchasers must register with the booking clerk prior to commencement of the sale.

- 2. On behalf of the vendor, PGG Wrightson Ltd (PGW) will pay a purchasing rebate of 6% of the purchase price excluding GST, plus GST, to livestock agents with a PGW Monthly Account. This also applies to Accredited Agencies on bidr<sup>®</sup> where the buyer has registered on bidr<sup>®</sup> under that Accredited Agency.
- 3. All Lots sold exclusive of G.S.T
- 4. PAYMENT: Fourteen days after the sale.

bidr $^{\odot}$ 's Conditions of Sale and Terms of Use apply. These terms can be inspected at https://bidr.co.nz/content/user-terms-conditions

PGG Wrightson (PGW)'s Monthly Account Terms of Trade also apply to the extent deemed relevant by PGW. The current versions of PGW's Monthly Account Terms of Trade are also available online at: https://www.pggwrightson.co.nz/Our-Company/Terms-and-Conditions or in hardcopy on request.

- 5. Although all care has been taken in compiling this Catalogue, no responsibility will be taken for any errors or omissions thereof.
- 6. No warranty will be given with any Lot, and as all Lots are open for inspection prior to the sale, the same are sold with all faults, if any. No compensation shall be made in respect of any fault or error of description of any Lots; however, the vendor reserves the right to make compensation to a buyer if it is the vendor's wish. It is recommended to inspect bulls before the sale where possible.
- 7. Every Lot will be at the risk of the purchaser as from the fall of the hammer.
- 8. Buyers are advised to insure Bulls. All Bulls remaining on the property pending delivery should be insured by the Purchaser as no responsibility shall be taken by the Vendor. All bulls are to be uplifted by 1 July, 2023 unless arrangements prior to the sale have been made.
- ALL STUD BULLS purchased must be uplifted as soon as transport is available. Transfers will be available on Stud Bulls. Please provide Transfer Herd Number(s) to the vendor on the Purchaser's Slip if a transfer is required.
- 10. All Bulls have been Service and Semen tested. All bulls are BVD Tested Negative and vaccinated for BVD with Hiprabovis prior to sale.
- 11. T.B. STATUS C10.

### For further information contact:

- The bidr<sup>®</sup> team is always available to help purchasers get signed up and registered, and the HelpDesk is proudly managed in-house from the Waikato. Please call 0800 TO BIDR (0800 86 2437), or email enquiries@bidr.co.nz for assistance at any point. Alternatively, contact Aimee Flynn, National Territory Manager, for any enquiries on 027 282 1710.
- The Auctioneer: Mr Cam Heggie PGG Wrightson Genetics 027 501 8182
- Your own livestock agent.
